DO YOU WANT TO MANAGE YOUR
ENTRIES WITH ONE CLICK?
CHOOSE DOORA!

Manage your entries with one click!

Doora, in collaboration with Remootio, presents the **57402** module, a management unit that allows the opening and control of doors, garages and gates, through the use of a simple App.

Functionality:

1. **Remote opening** with free App from anywhere in the world at any time;
2. **Real-time door status** monitoring via App;
3. **Event history** to always keep track of who enters and when;
4. **Remote user management** and the ability to set temporary access, for specific periods or weekly;
5. **Call notifications** directly on your smartphone thanks to the integration of a button on the system.

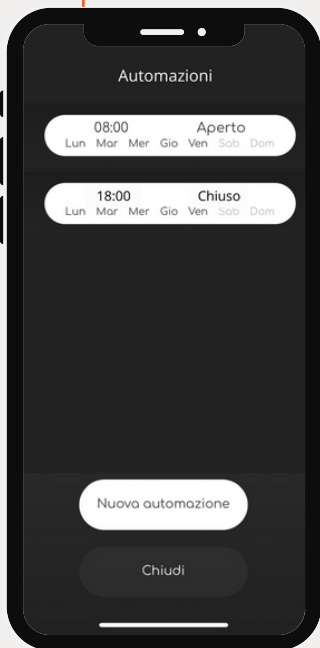

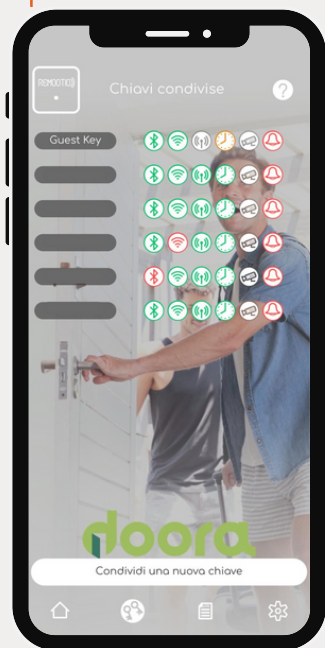

Suitable for:

- **Home systems**, to manage your entrances (such as doors, gates or garages) directly from your mobile phone;
- **B&Bs and Holiday Homes**, to solve the problem of delivering keys to their guests, improve the security and quality of the service offered and always have access history under control;
- **Co-working spaces**, to better manage workers' shifts;
- **Automatic laundries** for managing openings and checking the status of the door remotely.

Download the app!

Easy **sharing** of **electronic key** (via **QR** or **link**).

Automation of openings and closures.

Full control by the admin over the electronic keys assigned to users.

He can decide:

- **Access modes:** Wi-Fi, Bluetooth, Internet (or all 3 together)
- The **duration** of the **key's validity**
- The **time slots**.

Sending notifications to report the door status (open - closed) and recording activities on the App.
